Market Commentary

Generali Equity Growth recorded a performance of -7.96% in May 2024. The JCI recorded a performance of -3.64% in May 2024, falling from around 7230 to around 6970. The speculations on when the FED would cut its rate, the global market fluctuations, the geopolitical tensions in the Middle East, and the sharp corrections of several highly speculative large-cap domestic stocks might have contributed to the higher market volatility and the sharp equity market correction. The negative sentiments generated by these events lowered the optimism of market participants and made investing in the domestic market less appealing. Regardless, Indonesia's fundamentals remained strong and supportive, as shown by the high manufacturing PMI (52.1 in May vs. 52.9 in April), a slightly lowered inflation rate (2.84% YoY in May vs. 3.00% YoY in April), its increased foreign exchange reserves (USD139 billion in May vs. USD136.2 billion in April), and the stable Rupiah (IDR/USD 16,255 in May vs. 16,262 in April). Nevertheless, the following large-cap stocks represented the stock market movement this month (e.g., BBCA -5.61%, BREN -10.84%, AMMN +24.48%, TPIA +21.12%, BBRI -12.15%, BYAN -5.15%, BMRI -14.49%, TLKM -8.52%, ASII -16.70%, BBNI -16.19%).
