### Market Commentary

The Generali Equity Index recorded a performance of -14.39% in February 2025. The JCI recorded a performance of -11.80% in February 2025, as dropping from 7100 level the 6300 level. The Indonesian stock market was volatile this month, influenced by both domestic and international factors. Firstly, the launch of Indonesia's sovereign wealth fund Danantara was not well received as it raised concerns about corruption and mismanagement. Secondly, the new US tariff policies on China, Mexico, Canada, and the EU had caused global economic uncertainty, leading to massive sell-offs in EM investments like Indonesia. Lastly, the Rupiah had weakened significantly (IDR/USD 16,585 in Feb25 vs. 16,344 in Jan25), requiring central bank intervention and becoming one of the worst-performing EM currencies. All these factors contributed to reduced investor confidence and the capital flight away from the Indonesian stock market (foreign net sell of about IDR 18.19 trillion mtd), despite its good fundamentals, such as its high foreign exchange reserve levels (USD 154.5 billion in Feb) and GDP growth rate (5.02% YoY in 4Q24). Nonetheless, the following large-cap stocks drove the stock market movement this month (e.g., BBCA -10.85%, BREN -32.13%, BYAN -5.63%, TPIA -5.63%, BBRI -20.38%, AMMN -12.96%, BMRI -23.65%, DSSA -31.31%, TLKM -11.65%, DCII +149.73%).
